The certificate from the case history.

Patient Vladimir Cherpakov, 3 years old (born August 7, 2003), residing at 145 Karl Marx St., Apt. 82, Khabarovsk, has been receiving medical treatment at the Territorial Children's Clinical Hospital since July 26, 2005.

Diagnosis: Left-sided neuroblastoma of retroperitoneal space pT3cN 1 bMO, stage III.

The patient has received 8 courses of chemotherapy, radial therapy.

All the conservative methods of treatment have been exhausted by the present time. There is a residual tumor still and it requires a complicated operative treatment.

The child's parents are seeking an opportunity for perform an operation abroad.
